[1] The Total Number of Records Posted to the NDNH includes records submitted by both states and federal agencies. Therefore, the national totals are higher than the totals reported in the state-by-state report because that report does not include any records posted by federal agencies.

[2] The Total Number of Unique Persons in the FCR is derived by unduplicating SSNs across all participant types. The figures for the individual participant types are unduplicated within that category but not between them--i.e., an individual may appear in more than one category, but is only counted once within that category and only once in the total. As a result, the counts for the individual participant types may not add up to the Total Number of Unique Persons in the FCR. In addition, an individual can be a child support case participant in more than one state but is only counted once in the nationwide total.

[3] The Total Number of Unique Persons (NCPs and PFs) Matched is derived by unduplicating SSNs located across all data types (NH, QW, UI). The figure is unduplicated within each data type but not between them--i.e., an individual may appear in more than one category but is only counted once in that category and once in the total. As a result, the individual NH, QW, and UI counts may not add up to the Total Number of Unique Persons Matched.

[4] The MSFIDM match is performed quarterly. If an obligor has an account open over two quarters, the match would be duplicated each quarter. To compensate for this, the average of the four quarters during the fiscal year was used. Since an obligor can have more than one account, there are always more accounts than obligors located.

[5] States use the Child Support Enforcement Network (CSENet) to communicate case data and requests to other states automated systems in order to process interstate cases more effectively. A valid transaction involves the complete process of one state initiating and forwarding a request, and the appropriate state receiving this request. An Exchange agreement allows one state to forward a request to another state using CSENet. The total number of exchange agreements that an individual state has reflects the number of other states that it can send requests to. The national total is the sum of exchange agreements in all states.

[1] Processing Year, the calendar year the collections actually took place.

[2] Tax Offsets are based on intercepts of Federal Tax Refunds, while Administrative Offsets are based on intercepts of certain federal payments such as vendor and miscellaneous payments (that is, expense reimbursement payments and travel payments) and federal retirement payments. The tax and administrative figures add up to the Total figures and include both TANF and Non-TANF.

[3] The TANF and Non-TANF figures add up to the Total figures and include both Tax and Administrative Offsets.

[4] A certified case may be representative of an individual debt or an accumulation of TANF or Non-TANF debts. The criteria for certification of a debt for Federal Income Tax Refund Offset are as follows:

In TANF or Title IV-E foster care cases: the amount of past-due support must be at least $150.

In Non-TANF or Medicaid-only cases: the amount of past-due support must be at least $500.

The criterion for certification of a debt for Administrative Offset is the amount of past-due support must be at least $25.

[1] The Total Unique Persons in the FCR is derived by unduplicating SSNs across all participant types. The figures for the individual participant types are unduplicated within that category but not between them --i.e., an individual may appear in more than one category, but is only counted once within that category and only once in the total. As a result, the counts for the individual participant types may not add up to the Total Unique Persons in the FCR. In addition, an individual can be a child support case participant in more than one state; in these situations they are counted in the total for each individual state in which they are a participant but are only counted once in nationwide total. As a result, the individual state totals add up to more than the nationwide total.

[2] Some states code their Putative Fathers as NCPs when submitting them to the FCR. For those states Putative Fathers are included in the NCP figure instead of the PF figure, which is NA.

This data was originally compiled and reported by the states and territories. OCSE assumes no responsibility or legal liability concerning the data's accuracy, reliability, completeness, timeliness, or usefulness.

[1] The Unique NCPs and PFs Matched is derived by unduplicating SSNs located across all data types (NH, QW, and UI). The figure is unduplicated within each data type but not between them--i.e., an individual may appear in more than one category but is only counted once in that category and once in the Unique Persons Matched column. As a result, the individual NH, QW, and UI counts may not add up to the Unique Persons Matched figure.

[2] These totals are summations of the individual state totals. Since an individual may be involved in child support cases in more than one state, there may be duplicates between the states. Therefore, these totals are higher than the unduplicated totals that are reported at the national level.

This data was originally compiled and reported by the states and territories. OCSE assumes no responsibility or legal liability concerning the data's accuracy, reliability, completeness, timeliness, or usefulness.

[1] Processing Year, the calendar year the collections actually took place.

[2] Tax Offsets are based on intercepts of Federal Tax Refunds, while Administrative Offsets are based on intercepts of certain federal payments such as vendor and miscellaneous payments (i.e., expense reimbursement payments and travel payments) and federal retirement payments. The Tax and Administrative figures add up to the total figures and include both TANF and Non-TANF.

[3] The TANF and Non-TANF figures add up to the total and include both Tax and Administrative Offsets.

* Both the IV-D and statewide PEP can exceed 100%. The IV-D PEP can exceed 100% because a state may count the number of nonmarital children in the child support caseload who have paternity established or acknowledged during the fiscal year and compare that to the number of nonmarital children in the child support caseload at the end of the fiscal year. The statewide PEP can exceed 100% because paternities can be established for older nonmarital children in addition to newborns.

How an Incentive Payment is Determined

Because of the complexity of the incentives formula set forth in section 458 of the Social Security Act, we have included an example of how the system would work in a particular year for State A. Let's make the following assumptions regarding State A (See Table A):

- State A's paternity performance level is 93 percent, making its applicable percentage 100 percent (see Table C)
- State A's order establishment performance level is 74 percent, making its applicable percentage 88 percent (see Table C)
- State A's current support collections performance level is 59 percent, making its applicable percentage 69 percent (see Table D)
- State A's arrearage support collections performance level is 60 percent, making its applicable percentage 70 percent (see Table D)
- State A's cost-effectiveness ratio is $4.40, making its applicable percentage 80 percent (see Table E)
- State A's collections base is $50 million (determined by 2 times the collections for Current Assistance, Former Assistance, and Medicaid Never Assistance plus Never Assistance collections and fees retained by other states)
- The maximum incentive for State A is:
    - $50 million collections base for paternity ($50 mil. times 1.00), plus
    - $44 million collections base for orders ($50 mil. times 0.88), plus
    - $34.5 million collections base for current collections ($50 mil. times 0.69), plus
    - $26.25 million collections base for arrearage collections ($50 mil. times 0.75[1] times 0.70) plus
    - $30.0 million collections base for cost-effectiveness ($50 million times 0.75[1] times 0.80) equals
    - Resulting in a maximum incentive base amount of $184.75 million for State A.

[1] Because the measure has less weight.

Table A

Measure	State A's Performance Level	Applicable Percentage based on Performance	Weight	State A's Collection Base (assumed to be $50,000,000)
Paternity Establishment	93%	100%	1.00	$50,000,000
Order Establishment	74%	88%	1.00	$44,000,000
Current Collections	59%	69%	1.00	$34,500,000
Arrearage Collections	60%	70%	.75	$26,250,000
Cost-Effectiveness	$4.40	80%	.75	$30,000,000
State A's Maximum Incentive Base Amount	--	--	--	$184,750,000

We must now make some assumptions regarding the other States. Let's assume that there are only two other States in our country--and the maximum incentive base amount is $84 million for State B and $50 million for State C, making the total maximum incentive base amount $318.75 million for all three States (See Table B).

- We must now determine what is State A's share of the $318.75 million. It is 58 percent ($184.75 divided by $318.75).

Table B

State	Maximum Incentive Base Amounts	State's Share of $318,750,000	Incentive Payment Pool $461,000,000
A	$184,750,000	0.58	$267,199,216
B	$84,000,000	0.26	$121,487,059
C	$50,000,000	0.16	$72,313,725
Totals	$318,750,000	1.00	$461,000,000

- Let us assume it is FY 2003, so the incentive payment pool for the FY is $461 million (see Table F).
- Since State A's share is 0.58, this state has earned 58 percent of the $461 million incentive payment pool that Congress is allowing, or $267.2 million ($461 mil. x 0.58) incentive payment for this particular fiscal year.

Incentive Pool Payment, FYs 2001-2025

The incentive payment pool is:

- $429,000,000 for fiscal year 2001
- $450,000,000 for fiscal year 2002
- $461,000,000 for fiscal year 2003

- $504,000,000 for fiscal year 2009
- $504,000,000 for fiscal year 2010
- $513,000,000 for fiscal year 2011
- $526,000,000 for fiscal year 2012
- $538,000,000 for fiscal year 2013
- $547,000,000 for fiscal year 2014
- $556,000,000 for fiscal year 2015
- $558,000,000 for fiscal year 2016
- $563,000,000 for fiscal year 2017

- $609,000,000 for fiscal year 2021
- $629,097,000 for fiscal year 2022
- $678,795,663 for fiscal year 2023
- $713,414,242 for fiscal year 2024
- $735,530,084 for fiscal year 2025

The incentive payment pool after FY 2008 is the amount of the incentive payment pool for the preceding FY, multiplied by the percentage by which the Consumer Price Index (CPI) for that preceding FY exceeds the CPI for the second preceding FY.

The CPI for a FY is the average of the CPI for the 12-month period ending on Sept. 30 of the FY. The CPI means the last CPI for all-urban consumers published by the United States Department of Labor. The NOT seasonally adjusted CPI numbers are used.

The percentage increase between the preceding FY (FY 2008) and second preceding FY (FY 2007) is about 4.44%. So, $483 million (the FY 2008 incentive pool amount) plus 4.44% equals about $504 million (the FY 2009 incentive pool amount).
